

APS VICTORIA SEED LIST 2020 - Updated 1 June 2020

All current members are entitled to six packets of seed from the list of available species, upon receipt of each quarterly edition of *Growing Australian*.

INSTRUCTIONS

1. Write down a list of your six preferred species and then also include a further list of alternatives in case one or more species are no longer available.
2. Prepare a self-addressed envelope that includes postage. This envelope should preferably be DL size (22cm x 11cm) as it is difficult to fit seed pockets in anything smaller. The postage currently required is a \$1 stamp or equivalent concession stamp. If requesting a seed that is of a *Brachychiton* species, then please provide \$2 of postage due to the large size of its seeds.
3. Place both the list and self-addressed envelope in an envelope marked to **APS Victoria Seed Bank, c/- Marj Seaton, 36 Voumard Street, Oakleigh South, Vic 3167**
4. The Seed Bank Curator will send you 6 packets in order of your choice. If any of these have run out in the meantime, they will send you those species that are listed as alternatives by you. Up to six alternatives are recommended.

Email enquiries can be directed to seedbank@apsvic.org.au, however orders must still be made by post.

Note: plant heights given are only a guide.
